

Dear customer:

Your interest is to ensure a trouble-free and efficient operation of your installation. LEITNER Original spare parts offer you the highest level of safety and reliability.

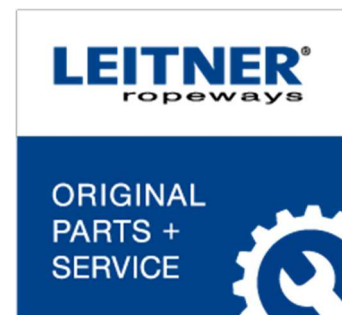

Our customers appreciate the long service life of our original spare parts. LEITNER original spare parts are perfectly designed to our systems in terms of quality and accuracy of fit and protect against costly standstills in the long term. We are convinced that the use of LEITNER original spare parts pays off in every respect! Equally important to us are quick identification of the right parts and worldwide availability. That is why our experienced service experts are available to advise you at any time and provide you with the right spare parts in the shortest possible time. We also provide an extensive spare parts supply for long running installations.

Original LEITNER spare parts for your safety:

- Highest quality is our standard: Outstanding parts quality at attractive prices
- Safe and reliable plant operation
- One stop shopping: the entire LEITNER spare parts spectrum from a single source
- Worldwide delivery: the right spare part at the right time in the right place
- Excellent technical support: through our experienced staff

Test us for all spare and wear parts that you need for your LEITNER systems.

Highest quality at attractive prices - a combination that will convince you!

Please discuss your needs with your account manager in time:

In the past year 2017, we experienced a strong upswing for the entire economy. After several years of recession, the economy has now reached a steady growth. The prospects for the years 2018 and 2019 are also currently in a very positive light.

However, this economic upswing also has an impact on our supply chain.

The delivery times of many of our suppliers, be it for catalog parts (ball / roller bearings, electrical parts, special screwed connections) as well as for drawing parts (PVC parts, rubber rings, clamps and larger machine components), have in some cases drastically increased.

In order to be able to react accordingly we are gladly ready to support you and to assist you with this year's planning and ordering of accruing work and spare parts. We therefore ask you to consider this circumstance and to inform us in good time in order to provide you with the best possible service.
